

2.

PROVIDED:

1. All trees cut that may be suitable for saw timber will be cut into saw mill stock lengths by the Grantee and shall be placed on the edge of the right of way and shall be the property of the Grantor.

2. All tops and brush cut from the right of way shall be stacked in the center of the right of way and there burned by the Grantee, with all possible precautions being taken to prevent forest fires or other damage to property of the Grantor.

3. It is understood that the right of way to be used under this agreement shall be forty feet in width measuring twenty feet from the center on each side of the power line as constructed, together with the right to cut away and keep clear of said line such trees, not actually on the right of way, that may endanger the proper maintenance and operation of the line. Subject, however, to Paragraph 5 and all restrictions set forth herein.

4. The location of the power line and right of way is to be approximately along the line as now located and staked and as shown on a certain print made by the Grantee, dated July 15, 1963, labeled "WSPA-TV Ext., Hogback Mt."; and will enter the property of the Grantor at the state line between South Carolina and North Carolina and termi-
