

and the streets and public places of said property, and to construct, maintain and operate in, upon, and through said premises, in a proper manner with poles, wires, conduits, cables, and other apparatus for the purpose of distributing power by electricity, and for telephone purposes, where lines for such purposes are now located, pursuant to the terms of the within deed and at the cost of the Grantee.

- B. The right and easement to construct, maintain, and operate extensions of such lines and additional lines for such purpose along and across the streets and public places upon the lands of the Grantors, and along the rear and side lines of each of the lots into which the lands of the Grantors are now or hereafter may be subdivided.
- C. The right and easement to connect in a reasonably direct and proper manner all such lines with the premises of customers to be served from same.
- D. The right, privilege, and easement at all times to enter the premises above mentioned for the purpose of inspecting said lines and making necessary repairs and alterations thereon; together with the right to keep said lines free and clear of all trees and other obstructions that may in any way interfere with or endanger the proper maintenance and operation of the same.
- E. The right to relocate any of said lines over the premises to conform to any future highway relocation, widening or improvement, or where lines may interfere
