BOOK 1132 PAGE 995

GENERAL DESCRIPTION OF IMPROVEMENTS TO COMMUNITY CASH FACILITY

The existing facility is being renovated to accommodate approximately 130 Engineering Personnel. This effort will include limited upgrading of the utilities, water and sanitary lines, and some reconditioning or modification of the existing air conditioning units. Additional permanent walls will be constructed to provide additional toilet facilities, and certain existing walls will be painted. Current plans include carpeting the main floor area and installing movable partitions to create office areas. The details of these plans may be seen on the detail drawings which will be available for review at the office of Daniel Engineering.

It is agreed by all parties concerned that Community Caah will remove all equipment and fixtures which are not part of the permanent structure and all signs located on the premises.
