

(11) Nothing herein contained shall be construed to prohibit the use of more than one lot or portions of one and more lots as a single residential building site, provided that said lot would otherwise meet the requirement as to size, set-back line and directional facing of said building as determined by the Architectural Committee.

ARTICLE II: SET BACKS, LOCATION AND SIZE OF IMPROVEMENTS AND OF BUILDING PLOTS

(1) No building shall be erected on any lot nearer to the front lot line or nearer to the side street line than the building set back line shown on the recorded plat. Any such building shall face toward the front line of the lot except that building to be constructed on corner lots shall face in the direction designated by the Architectural Committee. No building shall be located nearer to any interior side lot line than the distance represented by ten percent of the width of the lot (at the building set-back line) on which said building is to be located.

(2) Other than residence, any detached building erected shall be at least 75 feet from the front lot line and no nearer than 5 feet to any side or rear lot line.

(3) No wall, fence or hedge shall be erected across or along the front of any lot and nearer to the front lot line than the building set-back line having a height of more than three feet, unless approved by the Architectural Committee. No corner lot shall have a wall, fence or hedge erected any closer to the street than the front building line of any adjacent lot unless approved by the Architectural Committee. Any such wall, fence, or hedge proposed to be erected or placed on any such lot whether as part of the architect's residence design or a later addition must receive the approval in writing of the Architectural Committee.
