Mr. Sam R. Putnam, Jr., A.I.A.
J. E. Sirrine Company
P. O. Box 5456
Greenville, S. C. 29606

Dear Mr. Putnam:

I enjoyed meeting you on Wednesday and having the opportunity to review the preliminary plans to "Rolling Green Village". This certainly is a fine project and will be a great asset to the Greenville Area.

I appreciate your desire to construct this project using the most up-to-date methods of insulation. I recommend that you follow very closely the guidelines found in Duke Power's energy efficient structure program. By doing so, this will qualify all the individually metered residential units for Duke Power's residential conservation (RC) rate.

We feel that the specifications set forth in this program will cause the residential units to realize the maximum in energy conservation.

By using these high levels of insulation, a smaller size heating and cooling unit can be used resulting in an initial saving to the developer and an on going saving to the occupant through lesser energy usage.

When I can be of further service to you or any of your associates, please call.

Sincerely,

John Cooley
John Cooley
