

## MAJOR LATERAL PIPE LINES

## TEXAS LATERALS

One 4-inch lateral loop pipe line section approximately 1.39 miles in length, beginning at Milepost 3.693 on the Hartman Lateral, located in the James Quinn Survey A-395, and continuing in a southwesterly direction to the tie-in with the Bitterly Well Lateral and the Schrade Well Lateral, located in the Mumford House Survey A-226 all in De Witt County, Texas. Included in this lateral loop section is a top tap assembly, consisting of two block valves and one check valve, at the beginning of the loop section.

One 4-inch lateral pipe line approximately 0.03 miles in length beginning at Milepost 24.04 on the 14-inch White Kitchen Lateral and continuing in a southerly direction to the outlet tee in the Quintana #2-3, #13 M&R Station, all in the C. Sullivan Survey, A-1089, La Salle County, Texas.

## LOUISIANA LATERALS

One 24-inch lateral pipe line "C" approximately 9.15 miles in length, beginning at Compressor Station No. 51 located in Section 37, T-5-S, R-1-W, Evangeline Parish and continuing in a southerly direction, crossing St. Landry Parish to M.P. 9.15 located in Section 11, T-7-S, R-1-W, Acadia Parish, all in the State of Louisiana. Included in this lateral pipe line loop section is a lateral valve and scraper trap assembly with crossover to the existing crossovers at Station 51, and a lateral valve with double crossover to the 20-inch Line "A" at the end of the loop section.

One 30-inch lateral pipe line loop approximately 26.25 miles in length, beginning at the tie-in to the existing 24-inch Southeast Louisiana Lateral at Compressor Station 65, located in Section 4, T-1-S, R-5-E, St. Helena Parish, and continuing in a southerly direction to the end of the loop section at M.P. 26.27 located in Section 9, T-5-S, R-4-E, Livingston Parish, Louisiana. Included in this lateral loop section is a lateral valve and a check valve at the beginning of the section; a lateral valve with crossovers to the suction and discharge lines to Compressor Station 65 at M.P. 0.27; a receiving trap assembly at M.P. 0.30; a lateral valve with double crossover to the existing 24-inch line at M.P. 15.57; and a crossover to the existing 24-inch line at the end of the loop section.

One 20-inch lateral pipe line loop section approximately 18.69 miles in length, beginning at Transcontinental's valve lot at Cow Island Junction, located in Section 29, T-13-S, R-2-E, and continuing in a southerly direction to the north end of the existing lateral loop located
