

syth, Stokes, Surry, Wilkes, Davidson, Davie, Rowan, Stanley, Union, Cabarrus, Iredell, Alexander, Catawba, Burke, Rutherford, Lincoln, Cleveland, Gaston, and Mecklenburg Counties, in the State of North Carolina; and Cherokee, Spartanburg, Greenville, Pickens, Oconee, Anderson, Abbeville, Greenwood, Union, Newberry, Laurens, Chester, and York Counties in the State of South Carolina; all the property and rights in property so conveyed to the Duke Power Company by any and all said deeds are conveyed and covered by this Indenture and is more specifically described elsewhere herein or intended so to be.

All the deeds mentioned in this Group C from Great Falls Power Company and Southern Power Company, respectively, to Duke Power Company being dated December 19, 1927.

## DIVISION II.

### Transmission Lines.

1. All that 100,000 volt double circuit steel tower line extending from the Wateree Plant of Duke Power Company, in the County of Kershaw, in the State of South Carolina, to Gastonia, in the State of North Carolina, and from Gastonia, North Carolina, to China Grove, North Carolina, and from China Grove, North Carolina, through the Cities of Salisbury, High Point, Greensboro, Burlington and Durham, in the State of North Carolina, to a point about midway between Raleigh, North Carolina, and Durham, North Carolina, and being approximately 251.74 miles in length and passing through the following counties in South Carolina, to wit: Kershaw, Chester and York, and the following counties in North Carolina, to wit: Gaston, Mecklenburg, Cabarrus, Rowan, Davidson, Guilford, Alamance, Orange, Durham and Wake.

2. All that 100,000 volt double circuit steel tower line extending from the Cedar Creek Plant of Duke Power Company, in the County of Lancaster, State of South Carolina, through the Town of Lancaster, S. C., and the Towns of Monroe and Albemarle, N. C., to Badin, N. C., and being approximately 74.15 miles in length and passing through the following counties in South Carolina, to wit: Lancaster and Chester, and the following counties in North Carolina, to wit: Union and Stanly.

3. All that 100,000 volt double circuit steel tower line extending from Albemarle, N. C., to Salisbury, N. C., and being approximately 26 miles in length and passing through the following counties in North Carolina, to wit: Stanly, Cabarrus and Rowan.

4. All that 100,000 volt double circuit steel tower line extending from Badin, N. C., through High Rock, N. C., to High Point, N. C., and being approximately 47 miles in length and passing through the following counties in North Carolina, to wit: Stanly, Davidson, Randolph and Guilford.

5. All that 100,000 volt double circuit steel tower line extending from the Great Falls Plant of Duke Power Company, in the County of Chester, State of South Carolina, through the Catawba Plant of said Duke Power Company, in the County of York, State of South Carolina, and through the City of Charlotte, N. C., to the Mountain Island Plant of the Southern Public Utilities Company, located in the County of Gaston, State of North Carolina, and being approximately 61.20 miles in length and passing through the following counties in South Carolina, to wit: Chester and York, and Mecklenburg County in North Carolina.

6. All that 100,000 volt double circuit steel tower line extending from the Bridgewater Plant of Duke Power Company, in the County of Burke, State of North Carolina, through the Cities of Statesville and Winston-Salem, N. C., to Greensboro, N. C., together with a tap line of similar type construction extending from the aforesaid line to the Rhodhiss Plant of said Duke Power Company, in the County of Caldwell, North Carolina, and also a certain 100,000 volt double circuit steel tower line extending from the Lookout Shoals Plant of said Duke Power Company and approximately parallel with the aforesaid line to the City of Statesville, N. C., and being approximately 143.71 miles in length and passing through the following counties in North Carolina, to wit: Burke, Catawba, Iredell, Davie, Forsyth and Guilford.

7. All that 100,000 volt double circuit steel tower line extending from the City of Statesville, N. C., to the City of Salisbury, N. C., and

being approximately 26.60 miles in length and passing through the following counties in North Carolina, to wit: Iredell and Rowan.

8. All that 100,000 volt double circuit steel tower line extending from the City of Winston-Salem, N. C., to the City of High Point, N. C., and being approximately 12.86 miles in length and passing through the following counties in North Carolina, to wit: Guilford and Forsyth.

9. All that 100,000 volt double circuit steel tower line extending from Great Falls, in the County of Chester, State of South Carolina, through the City of Chester, to the City of Spartanburg, in the State of South Carolina, and extending thence through the Cities of Chester, Spartanburg, Greenville, Easley, Seneca and Westminster to the junction of the aforesaid line with the lines of the Georgia Railway and Power Company at a point near Tallulah Falls, Georgia, the aforesaid line extending to the state line between Georgia and South Carolina, and being approximately 159.68 miles in length and passing through the following counties in South Carolina, to wit: Chester, Union, Spartanburg, Greenville, Pickens and Oconee.

10. All that 100,000 volt double circuit steel tower line extending from Great Falls, in the County of Chester, State of South Carolina, through the Cities or Towns of Winnsboro, Newberry, Greenwood and Belton, in the State of South Carolina, to the City of Greenville, South Carolina, and being approximately 139.32 miles in length and passing through the following counties in South Carolina, to wit: Chester, Fairfield, Newberry, Greenwood, Anderson and Greenville.

11. All that 100,000 volt double circuit steel tower line extending from the City of Newberry, in the State of South Carolina, through the Towns of Whitmire and Union, in the State of South Carolina, to Mount Tabor, S. C., and being approximately 38.85 miles in length and passing through the following counties in South Carolina, to wit: Newberry and Union.

12. All that 100,000 volt double circuit steel tower line extending from Spartanburg, S. C., to Forest City, N. C., and being approximately 27.68 miles in length and passing through the County of Spartanburg in South Carolina and the County of Rutherford in North Carolina.

13. All those 44,000 volt transmission lines extending from Great Falls Plant of the Duke Power Company, in the County of Chester, S. C., to the Catawba Plant of said Duke Power Company in the County of York, S. C., consisting of one double circuit steel tower line and one wooden pole line parallel thereto; and a single circuit wooden pole line from Landsford to Lando in Chester County, S. C., and being approximately 33 miles in length and passing through the following counties in South Carolina, to wit: Chester and York.

14. All those 44,000 volt transmission lines extending from the Catawba Plant of Duke Power Company, in the County of York, S. C., to the City of Charlotte, N. C., consisting of two parallel single steel tower lines, and being approximately 20 miles in length and passing through York County in South Carolina and Mecklenburg in North Carolina.

15. All that 44,000 volt double circuit steel tower line extending from the Catawba Plant of Duke Power Company, in the County of York, S. C., to the City of Gastonia, N. C., passing through the Towns of Lowell, McAdenville and Belmont, all in the State of North Carolina, and being approximately 26 miles in length and passing through York County in South Carolina and Gaston County in North Carolina.

16. All that 44,000 volt double circuit steel tower line extending from the Catawba Plant of Duke Power Company, in the County of York, S. C., through the Town of Clover, S. C., to a point within four miles of Gastonia, N. C., and from thence with two single circuit parallel wooden pole lines to the City of Gastonia, N. S., and being approximately 27 miles in length and passing through the County of York in South Carolina and the County of Gaston in North Carolina.

17. All that 44,000 volt double circuit steel tower line extending from the Catawba Plant of Duke Power Company, in the County of York, S. C., to Rock Hill, S. C., and being approximately 6 miles in length and located in the County of York, South Carolina.

18. All that 44,000 volt single circuit wooden pole line extending from the Ninety-Nine Islands Plant of Duke Power Company, in the County of Cherokee, State of South Carolina, to Clover, S. C., and
