

(219) The Jacksonville-Cherry Point 110 KV single-circuit transmission line extending from the Company's Jacksonville 110 KV Substation at Jacksonville, North Carolina, to the Company's Cherry Point 110 KV Substation, at Cherry Point, North Carolina, and including the Camp Lejeune 110 KV Tap Line from the Company's Jacksonville-Cherry Point 110 KV Line to the Company's Camp Lejeune 110 KV Substation at Camp Lejeune, North Carolina, a distance of 39.19 miles.

(220) The Asheboro-Asheboro West 110 KV single-circuit transmission line extending from the Company's Asheboro 110 KV Substation, at Asheboro, North Carolina, to the Company's Asheboro West 110 KV Substation at Asheboro, North Carolina, a distance of 1.57 miles.

(221) The Fayetteville-Fort Bragg 110 KV single-circuit transmission line extending from the Company's Fayetteville 110 KV Substation to the junction of the Company's Fort Bragg 110 KV Tap Line with the Company's Duke-Fayetteville 110 KV Line, a distance of 8.62 miles.

(222) The Method-Milburnie 110 KV single-circuit transmission line extending from the Company's Method-Selma 110 KV Line near Garner, North Carolina, to the Company's Milburnie 110 KV Substation, near Raleigh, North Carolina, a distance of 6.63 miles.

(223) The Milburnie-Selma 110 KV single-circuit transmission line extending from the Company's Method-Selma 110 KV Line, near Garner, North Carolina, to the Company's Milburnie 110 KV Substation, near Raleigh, North Carolina, a distance of 6.63 miles.

(224) The Clayton 110 KV single-circuit transmission line extending from the Company's Method-Selma 110 KV Line, near Clayton, North Carolina, to the Company's Clayton 110 KV Substation, near Clayton, North Carolina, a distance of .11 mile.

(225) The Champion Fibre 110 KV single-circuit transmission line extending from the Company's North Canton-Elk Mountain 110 KV Transmission Line, near Canton, North Carolina, to the Company's Champion Fibre 110 KV Substation, at Canton, North Carolina, a distance of .61 mile.

(226) The Darlington County-Florence 110 KV single-circuit transmission line extending from the Company's Darlington County Steam Electric Generating Plant, near Hartsville, South Carolina, to the junc-

tion with the Company's former Hartsville-Wateree 110 KV Line, near Hartsville, South Carolina, a distance of 2.96 miles—under construction.

(227) The Darlington County-Laurinburg 110 KV single-circuit transmission line extending from the Company's Darlington County Steam Electric Generating Plant, near Hartsville, South Carolina, to the junction with the Company's former Hartsville-Laurinburg 110 KV Line, near Hartsville, South Carolina, a distance of 10.11 miles—under construction.

(228) The Darlington County-Sumter 110 KV single-circuit transmission line extending from the Company's Darlington County Steam Electric Generating Plant, near Hartsville, South Carolina, to the junction with the Company's former Hartsville-Sumter 110 KV Line, near Hartsville, South Carolina, a distance of 6.12 miles—under construction.

(229) The Darlington County-Wateree 110 KV single-circuit transmission line extending from the Company's Darlington County Steam Electric Generating Plant, near Hartsville, South Carolina, to the junction with the Company's former Hartsville-Wateree 110 KV Line, near Hartsville, South Carolina, a distance of 3.14 miles—under construction.

(230) The Darlington County-Blewett 110 KV single-circuit transmission line extending from the Company's Darlington County Steam Electric Generating Plant, near Hartsville, South Carolina, to the junction with the Company's former Blewett-Hartsville 110 KV Line, near Hartsville, South Carolina, a distance of 9.67 miles—under construction.

(231) The Cumberland 66 KV single-circuit transmission line extending from the Company's Fayetteville-Hope Mills 66 KV Line, near Fayetteville, North Carolina, to the Company's Cumberland 66 KV Substation, near Cumberland, North Carolina, a distance of 3.78 miles.

(232) The East Street-Milburnie 66 KV single-circuit transmission line extending from the Company's East Street-Neverson 66 KV Line, near Raleigh, North Carolina, to the Company's Milburnie 110 KV Substation, near Raleigh, North Carolina, a distance of 1.08 miles.

(233) The Milburnie-Neverson 66 KV single-circuit transmission line extending from the Company's East Street-Neverson 66 KV Line, near Raleigh, North Carolina, to the Company's Milburnie 110 KV Substation, near Raleigh, North Carolina, a distance of 1.08 miles.
