

## DIVISION B

*Transmission Lines.*

The following described transmission lines (consisting of welded steel pipe) together with all machinery, apparatus, stations and structures which constitute a part of or are used in connection with said lines which Carolina has constructed for the transmission of gas:

(a) Approximately thirty and eight-tenths (30.8) miles of 8.625 inches outer dimension x 0.188 inches wall, pipe line (Line No. 1) extending from a point of connection with the system of Transcontinental Gas Pipe Line Corporation in Gaston County, North Carolina to a point south of Hickory, North Carolina.

(b) Approximately nineteen and one-tenth (19.1) miles of 6.625 inches outer dimension x 0.188 inches wall, pipe lines consisting of a seventeen and four-tenths (17.4) mile line (Line No. 2) extending from Line No. 1 to a point south of Morganton, North Carolina and a one and seven-tenths (1.7) mile line (Line No. 4) extending from Line No. 1 to Hickory, North Carolina.

(c) Approximately twenty and four-tenths (20.4) miles of 4.500 inches outer dimension x 0.188 inches wall, and 4.500 inches outer dimension x 0.237 inches wall, pipe lines consisting of a four and four-tenths (4.4) mile line (Line No. 3) extending from Line No. 2 to the plant of Great Lakes Carbon Corporation near Morganton, North Carolina, a fifteen and three-tenths (15.3) mile line (Line No. 5) extending from Line No. 4 to a point near Lenoir, North Carolina and a seven-tenths (0.7) mile line (Line No. 11) extending from Line No. 2 to Morganton, North Carolina.

(d) Approximately six and eight-tenths (6.8) miles of 3.500 inches outer dimension x 0.188 inches wall, pipe lines consisting of a one (1.) mile line (Line No. 6) extending from Line No. 1 to a point near Maiden, North Carolina, a two and one-tenth (2.1) mile line (Line No. 7) extending from Line No. 1 to Newton, North Carolina, a three (3.) mile line (Line No. 8) extending from Line No. 1 to
